## Richmond Richmond School - Te Kura o Ritimana Honey Available Soon

Our school beehive has recently been harvested for honey. This will soon be for sale. The honey pots contain a variety of locally sourced honey from central Auckland hives which includes our school. It is a multi-floral, raw honey, and has not been filtered so it still has high traces of pollen in it. This means you are getting the benefits of a multitude of different flowers and helps create it's unique taste.

This honey has not been heat treated so it still retains it's beneficial enzymes and antibacterial properties. As such it may start to crystallize as the weather gets cooler. It is still good to eat like this but if you prefer it runny either heat it in the microwave, or if you want to maintain it's raw status, warm it in a pot of water no hotter than 45 degrees C.

A 500g pot of honey is \$10. If you are interested in purchasing please click on the link below and an expression of interest. This will give us an idea of how much to purchase. All profits will go back into the maintenance of our school hive which grew to around 25 000 bees! Please do this by Friday 4th March.
