Maths

Strand

Statistics, choose a toy you have a lot of at home e.g LEGO, soft toys, mini characters etc.

- Put the toys in category by colour, size, theme
- Put each of these groups in a line next to each other.
- Which do you have the most of, the least of, or some which are the same.
- Draw a graph showing how the toys look.

Number

Play board games with dice, encourage counting.

Inquiry

As we are looking up to the sky, take the time to look out the window and notice the weather, make some predictions about the weather for the rest of the day. Were you right? What do you use to make predictions about the weather?

In the evening have a look at the night sky, what stars do you see? Create some art about what you saw. Can you take a photo and try and use this to create art from.

Ask some questions about space and find answers.

Check out [NASA for Kids](#)

Depending on age of student ideally 15-20 minutes each area, unless particularly enthusiastic on learning.
